# OCAC 2026 Taiwan Biotechnology Industry Visiting Program for Overseas Compatriot Entrepreneurs Information & Registration Guidelines

## I. Purpose and Objectives:

Taiwan's biotechnology industry development strategy centers on "smart technology" and "precision health for all ages." Leveraging Taiwan's strong ICT and semiconductor advantages, and combining biotechnology, AI, and medical services, the goal is to achieve high-value new drug development, innovative medical device development, and smart healthcare solutions by 2030, transforming Taiwan into a "major hub for biomedical R&D in the Asia-Pacific region" and making biotechnology Taiwan's next "national treasure." To strengthen the connection between global overseas compatriot businesses and the Taiwan biotechnology industry, introduce related new biotechnology product opportunities, enhance the competitiveness of overseas compatriot businesses, assist in the complementary connection of advantageous industries and resources at home and abroad, and help the Taiwan economy and Taiwan's advantageous technology products expand into international markets, this association invites overseas compatriot businesses interested in developing or currently operating biotechnology-related industries to return to Taiwan for visits and exchanges, creating a mutually beneficial and win-win situation.
